

520 Lafayette Road North St. Paul, MN 55155-4194

## Compliance Inspection Form

**Existing Subsurface Sewage Treatment Systems (SSTS)** 

Doc Type: Compliance and Enforcement

Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached forms – additional local requirements may also apply.	For local tracking purposes:
Submit completed form to Local Unit of Government (LUG) and system own within 15 days	er
System Status	
System status on date (mm/dd/yyyy): 7/2/2018	
	ompliant – Notice of Noncompliance grade Requirements on page 3.)
Reason(s) for noncompliance (check all applicable)  Impact on Public Health (Compliance Component #1) – Imminent threat to public Other Compliance Conditions (Compliance Component #3) – Imminent Tank Integrity (Compliance Component #2) – Failing to protect ground Other Compliance Conditions (Compliance Component #3) – Failing to Soil Separation (Compliance Component #4) – Failing to protect ground Operating permit/monitoring plan requirements (Compliance Component #4)	nt threat to public health and safety dwater to protect groundwater Indwater
Property address: 14597 41st St S Afton, MN 55001 Reas Property owner: Diane Crater Owner's representative: Mark Johnson, Edina Realty Repr	/Range: _28.028.20.12.0010 son for inspection:property sale ner's phone:
Comments or recommendations:  Existing tanks were re-used, a new pump and mound drainfield was installed.	
Certification  I hereby certify that all the necessary information has been gathered to determine determination of future system performance has been nor can be made due to unipossible abuse of the system, inadequate maintenance, or future water usage.	the compliance status of this system. No known conditions during system construction,

			(mm/aa/yyyy)				
4. Soil Separation - Compliance component #4 of 5							
Date of installation: 5/1/2018 (mm/dd/yyyy)	Unknown	Verification method(s):					
Shoreland/Wellhead protection/Food beverage lodging?	☐ Yes ☒ No	Soil observation does not expire. Previous soil observations by two independent parties are sufficient,					
Compliance criteria:		requirements differ.	ss site conditions have been altered or local irements differ.				
For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:	☐ Yes ☐ No	☐ Conducted soil observation(s) (Attac	ch boring logs) o drainfield)				
Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.		☐ Unable to verify (See Comments/Lipidal) ☐ Other (See Comments/Explanation)					
Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:	⊠ Yes □ No	Comments/Explanation: Soil boring B-1 0-11 silt top soil					
Drainfield has a three-foot vertical							
separation distance from periodically saturated soil or bedrock.*		17-36 silt	10 YR 3/4				
		Redox at 21"					
"Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV	☐ Yes ☐ No	Indicate depths or elevations	dicate depths or elevations				
or V systems built under 2008 Rules (7080. 2350 or 7080.2400 (Advanced Inspector License required)		A. Bottom of distribution media	98.7				
		B. Periodically saturated soil/bedrock	95.3				
Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.		C. System separation  D. Required compliance separation*	3.4				
Any "no" answer above indicates the failing to protect groundwater.  5. Operating Permit and Nitrogen		*May be reduced up to 15 percent i Ordinance.					
Is the system operated under an Operating	Permit?	Yes ⊠ No If "yes", A below is requi	red				
Is the system required to employ a Nitroger							
BMP = Best Management Practice(s) s							
If the answer to both questions is "n							
Compliance criteria							
a. Operating Permit number: <u>n/a</u>							
Have the Operating Permit requireme	nts been met?	☐ Yes ☐ No					
b. Is the required nitrogen BMP in place	oning?						
Any "no" answer indicates Nonce	ompliance.						
Upgrade Requirements (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
