npact on Public Health — C	compliance compo	nent #1 of 5			
ompliance criteria:		Verification method(s):			
stem discharges sewage to the ound surface.	☐ Yes ☒ No	⊠ Searched for surface outlet			
stem discharges sewage to drain	☐ Yes ☒ No	 ☑ Searched for seeping in yard/backup in home ☐ Excessive ponding in soil system/D-boxes 			
stem causes sewage backup into	☐ Yes ☒ No	☑ Homeowner testimony (See Comments/Explanation)☐ "Black soil" above soil dispersal system			
ny "yes" answer above indi		 ⊠ System requires "emergency" pumping □ Performed dye test □ Unable to verify (See Comments/Explanation) □ Other methods not listed (See Comments/Explanation) 			
omments/Explanation:					
ank Integrity – Compliance	component #2 of 5	5			
ompliance criteria:		Verification method(s):			
stem consists of a seepage pit, sspool, drywell, or leaching pit.	☐ Yes ☒ No	☑ Probed tank(s) bottom☑ Examined construction records			
Seepage pits meeting 7080.2550 may be compliant if allowed in local ordinance.		 ☐ Examined Constitution records ☐ Examined Tank Integrity Form (Attach) ☐ Observed liquid level below operating depth ☐ Examined empty (pumped) tanks(s) 			
Sewage tank(s) leak below their designed operating depth. ☐ Yes ☑ No					
ves, which sewage tank(s) leaks:		Probed outside tank(s) for "black soil"			
		☐ Unable to verify (See Comments/Explanation)☐ Other methods not listed (See Comments/Explanation)			
:her Compliance Condition	15 – Compliance con	nponent #3 of 5			
		ed, or appear to be structurally unsound. ☐ Yes* ☒ No ☐ Unknow			
Other issues (electrical hazards, etc.)	versely impact public health or safety. ☐ Yes* ☒ No ☐ Unknow				
Explain:					
System is non-protective of ground water for other conditions as determined by inspector . Yes* No *System is failing to protect groundwater.					
Explain: Drainfield no longer accepts effuent, necessitating emergency pumping of the septic tank.					
	estem discharges sewage to the bund surface. Istem discharges sewage to drain a consurface waters. Istem causes sewage backup into relling or establishment. In y "yes" answer above indivisem is an imminent threat ealth and safety. In y "ments/Explanation: In y "yes" answer above indivisem is an imminent threat ealth and safety. In y "yes" answer above indivisem consists of a seepage pit, sepool, drywell, or leaching pit. In y "yes" answer above indivisem if allowed in local ordinance. In y "yes" answer above indivisem is failing to protect grown to protect grown the sewage tank(s) leaks: In y "yes" answer above indivisem is failing to protect grown to the insues (electrical hazards, etc.) In y "yes" answer above indivisem is failing to protect grown the insues (electrical hazards, etc.) System is an imminent threat to explain: System is non-protective of ground	stem discharges sewage to the bound surface. stem discharges sewage to drain or surface waters. stem causes sewage backup into restablishment. stem is an imminent threat to public restablishment. stem causes sewage backup into restablishment. stem causes sewage backup into restablishment. stem causes sewage to drain restablishment. stem causes sewage to drain restablishment. stem causes sewage table public restablishment. stem causes sewage table public restablishment. stem causes sewage to drain restablishment. stem causes sewage table public restablishment. stem c

4 Soil Constration Compliance				
4. Soil Separation - Compliance co	omponent #4 or 5			
Date of installation: 1977 (mm/dd/yyyy)	Unknown	Verification method(s):		
Shoreland/Wellhead protection/Food beverage lodging?	☐ Yes ⊠ No	Soil observation does not expire. Previous soil observations by two independent parties are sufficient, unless site conditions have been altered or local		
Compliance criteria:		requirements differ.	erea or local	
For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:	☐ Yes ☐ No	☐ Conducted soil observation(s) (Ai☐ Two previous verifications (Attach☐ Not applicable (Holding tank(s), no	n boring logs)	
Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.		☐ Unable to verify (See Comments/E ☐ Other (See Comments/Explanation)		
Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:	☐ Yes ☐ No	Comments/Explanation: Soil testing not needed because it was done on 9/16/2015 & is still valid. A design for a replacement system is underway as of 7/23/2018.		
Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*				
"Experimental", "Other", or "Performance"	☐ Yes ☐ No	Indicate depths or elevations		
systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules (7080. 2350 or 7080.2400 (Advanced Inspector		A. Bottom of distribution media	0	
License required)		B. Periodically saturated soil/bedrock	0	
Drainfield meets the designed vertical separation distance from periodically		C. System separation	0	
saturated soil or bedrock.		D. Required compliance separation*	0	
Any "no" answer above indicates to failing to protect groundwater. 5. Operating Permit and Nitrogen		*May be reduced up to 15 percent if Ordinance. nce component #5 of 5	allowed by Local	
Is the system operated under an Operating		s ⊠ No If "yes", A below is requir	ed	
Is the system required to employ a Nitroger	n BMP? ☐ Yes	s ⊠ No If "yes", B below is requir	ed	
BMP = Best Management Practice(s)	specified in the system	design		
If the answer to both questions is "r	o", this section do	es not need to be completed.		
Compliance criteria				
a. Operating Permit number: n/a		☐ Yes ☐ No		
Have the Operating Permit requireme	nts been met?			
b. Is the required nitrogen BMP in place	and properly functioning	ng?		
Any "no" answer indicates Nonc	ompliance.			
Upgrade Requirements (Minn. Stat. § 115.55, discontinued within ten months of receipt of this ground water, the system must be upgraded, rep is not failing as defined in law, and has at least to its use discontinued, notwithstanding any local of Wellhead Protection Areas, or those used in con	notice or within a shorter placed, or its use disconting to feet of design soil separdinance that is more stric	period if required by local ordinance. If the s nued within the time required by local ordinal aration, then the system need not be upgrad at. This provision does not apply to systems	ystem is failing to protect nce. If an existing system led, repaired, replaced, or in shoreland areas.
