Property address: 13186 24th Street Court N.			Inspector initials/Date: ss   9/30/2020		
					(mm/dd/yyyy)
4. Soil Separation - Compliance component #4 of 5					
Date of installation: 10/11/2012	Unknown	Verif	ication n	nethod(s):	
(mm/dd/yyyy) Shoreland/Wellhead protection/Food beverage lodging? Compliance criteria:			observation does not expire. Previous soil ervations by two independent parties are sufficient, ss site conditions have been altered or local irements differ.		
For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:  Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.  Non-performance systems built April 1,	☐ Yes ☐ No	<ul> <li>Conducted soil observation(s) (Attach boring logs)</li> <li>☐ Two previous verifications (Attach boring logs)</li> <li>☐ Not applicable (Holding tank(s), no drainfield)</li> <li>☐ Unable to verify (See Comments/Explanation)</li> <li>☐ Other (See Comments/Explanation)</li> </ul> Comments/Explanation:			
1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:		Reviewed designers boring logs that were verified by the county when permit was issued 11/3/2011.			
Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*					
"Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules (7080. 2350 or 7080.2400 (Advanced Inspector License required)	☐ Yes ☐ No	A. Bottom of distribution media		+12	
		B. Periodically saturated soil/bedrock			-24
Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.		C. System separation			36
Any "no" answer above indicates the system is failing to protect groundwater.  D. Required compliance separation*   36					
Is the system operated under an Operating Permit?					
Is the system required to employ a Nitrogen BMP?					
BMP = Best Management Practice(s) specified in the system design					
If the answer to both questions is "no", this section does not need to be completed.					
Compliance criteria					
a. Operating Permit number:					
Have the Operating Permit requirements been met?			☐ Yes	∐ No	
b. Is the required nitrogen BMP in place and properly functioning?			☐ Yes	□No	
Any "no" answer indicates Noncompliance.					
Upgrade Requirements (Minn. Stat. § 115.55) discontinued within ten months of receipt of this i	An imminent threat to pur notice or within a shorter p	blic health eriod if re	and safety equired by l	y (ITPHS) must be upgrocal ordinance. If the sy	raded, replaced, or its use rstem is failing to protect

**Upgrade Requirements** (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
