

520 Lafayette Road North St. Paul, MN 55155-4194

Compliance inspection report form **Existing Subsurface Sewage Treatment System (SSTS)**

Doc Type: Compliance and Enforcement

Instructions: Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached supporting documentation - additional local requirements may also apply. Further information can be found here: https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance.

Property information	Local tracking number:	
Parcel ID# or Sec/Twp/Range: 11.028.20.43.0077 Loc	cal regulatory authority: Washington County 651-430-6655	
Property address: 16630 18th St S Lake St Croix Beach, MN 55	5043	
Owner/representative: Jesse Tyge	Owner's phone: 763-439-8236	
Brief system description: Two 1000 gallon septic tanks and a gra	avity drainfield	
System status		
System status on date (mm/dd/yyyy): 3/29/2021		
☐ Compliant – Certificate of compliance*	☐ Noncompliant – Notice of noncompliance	
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)	An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.	
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.	
☐ Soil separation (Compliance component #5) – Failing	to protect groundwater int #3) – Imminent threat to public health and safety int #3) – Failing to protect groundwater 500 (Compliance component #3) – Failing to protect groundwater if to protect groundwater ipliance component #4) – Noncompliant - local ordinance applies	
abuse of the system, inadequate maintenance, or future water usa	made due to unknown conditions during system construction, possible age.

1. Impact on public health – Compliance component #1 of 5 Compliance criteria: Attached supporting documentation: System discharges sewage to the Yes* No. Other: ground surface Not applicable ☐ Yes* 🛛 No System discharges sewage to drain tile or surface waters. System causes sewage backup into ☐ Yes* 🛛 No dwelling or establishment. Any "yes" answer above indicates the system is an imminent threat to public health and safety. Describe verification methods and results: Reviewed the history of the system and searched for surface outlet and seeping in yard - none observed during the inspection. 2. Tank integrity – Compliance component #2 of 5 Compliance criteria: Attached supporting documentation: ☐ Yes* 🛛 No System consists of a seepage pit, ☐ Pumped at time of inspection cesspool, drywell, leaching pit, or other pit? Name of maintenance business: Sewage tank(s) leak below their Yes* ☑ No License number of maintenance business: designed operating depth? Date of maintenance: Date of maintenance 8/6/2019 (mm/dd/yyyy): (must be within three years) If yes, which sewage tank(s) leaks: Any "yes" answer above indicates the system (See form instructions to ensure assessment complies with Minn. R. 7082.0700 subp. 4 B (1)) is failing to protect groundwater. Tank is Noncompliant (pumping not necessary – explain below) Other: Describe verification methods and results: The tanks were pumped and certified on 8/6/19 and were at normal operating level during the inspection.

3.	Other compliance conditions — Compliance component #3 of 5
	3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unsecured? ☐ Yes* ☑ No ☐ Unknown
	3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety? ☐ Yes* ☒ No ☐ Unkno *Yes to 3a or 3b - System is an imminent threat to public health and safety.
	3c. System is non-protective of ground water for other conditions as determined by inspector? ☐ Yes* ☒ No
	3d. System not abandoned in accordance with Minn. R. 7080.2500? ☐ Yes* ☒ No
	*Yes to 3c or 3d - System is failing to protect groundwater.
	Describe verification methods and results:
	7
	Attached supporting documentation: Not applicable
4.	Operating permit and nitrogen BMP* – Compliance component #4 of 5 🛛 Not applicable
	s the system operated under an Operating Permit? In the system operated under an Operating Permit? In the system design? In the system design?
	If the answer to both questions is "no", this section does not need to be completed. Compliance criteria:
	a. Have the operating permit requirements been met? ☐ Yes ☐ No
	b. Is the required nitrogen BMP in place and properly functioning? Yes No
	Any "no" answer indicates noncompliance.
	Describe verification methods and results:
	Attached supporting documentation:

5. Soil separation – Compliance component #5 of 5 Date of installation 12/5/1995 Unknown (mm/dd/yyyy) Shoreland/Wellhead protection/Food Yes No Attached supporting documentation: beverage lodging? Soil observation logs completed for the report (Attach) Compliance criteria (select one): Two previous verifications of required vertical separation (Attach) 5a. For systems built prior to April 1, 1996. ☐ Yes ☐ No* and not located in Shoreland or Wellhead ☐ Not applicable (No soil treatment area) Protection Area or not serving a food, beverage or lodging establishment: Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock. 5b. Non-performance systems built April 1. Yes □ No* Indicate depths or elevations 1996, or later or for non-performance A. Bottom of distribution media 36" systems located in Shoreland or Wellhead Protection Areas or serving a food, B. Periodically saturated soil/bedrock 72" beverage, or lodging establishment: 36" C. System separation Drainfield has a three-foot vertical separation distance from periodically 24" D. Required compliance separation* saturated soil or bedrock.* *May be reduced up to 15 percent if allowed by Local Ordinance. 5c. "Experimental", "Other", or "Performance" Yes No* systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080, 2350 or 7080,2400 (Advanced Inspector License required) Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock. *Any "no" answer above indicates the system is failing to protect groundwater. Describe verification methods and results: Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
