5. Soil separation - Compliance component #5 of 5 Date of installation 11/1/1990 ☐ Unknown (mm/dd/yyyy) Shoreland/Wellhead protection/Food ☐ Yes ☒ No Attached supporting documentation: beverage lodging? Soil observation logs completed for the report (Attach) Compliance criteria (select one): Two previous verifications of required vertical separation (Attach) 5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead ☐ Not applicable (No soil treatment area) Protection Area or not serving a food, beverage or lodging establishment: Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock. 5b. Non-performance systems built April 1, ☐ Yes ☐ No* Indicate depths or elevations 1996, or later or for non-performance

beverage, or lodging establishment:

Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*

5c. "Experimental", "Other", or "Performance" Systems built under pre-2008 Rules;
Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400
(Advanced Inspector License required)

Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.

systems located in Shoreland or Wellhead

Protection Areas or serving a food.

A. Bottom of distribution media

C. System separation

B. Periodically saturated soil/bedrock

D. Required compliance separation*

*Any "no" answer above indicates the system is failing to protect groundwater.

Describe verification methods and results:

Received design from updated septic. Soil borings attached along with signed off permit.

Instructed new owner to service the system once a year and keep fats, oils grease out of system. Instructed new owner to not overload the system by using to much water, doing to many load of launndry in one day, etc.

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.

^{*}May be reduced up to 15 percent if allowed by Local Ordinance.
