# ZIERKE SOIL TESTING

Bob Connelly 20260 Oxboro Lane N Marine on St Croix, MN 55047

May 2nd 2021

Dear Bob Connelly,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your system is <u>non-compliant</u> due to a lack of vertical separation between the bottom of your drain field and indicators of seasonally wet soil (redoximorphic features). Therefore, this system is considered "failing to protect groundwater" and <u>is not considered an imminent threat to public health</u>. I am required to provide copies of this report to you and to Washington County. You should contact them as to the next steps that will be required to bring the system into compliance.

Sincerely,

Benjamin Zierke

MPCA Lic 119, Cert 9594

# Compliance inspection report form

### **Existing Subsurface Sewage Treatment System (SSTS)**

Doc Type: Compliance and Enforcement

Instructions: Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached supporting documentation - additional local requirements may also apply. Further information can be found here: https://www.pca.state.mn.us/sites/default/files/wg-wwists4-31a.pdf.

Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance.

Property information	Local tracking number:					
Parcel ID# or Sec/Twp/Range: 2303220420006 Local regulatory authority: Washington County						
Property address: 20260 Oxboro Lane N Marine on St Croix, MN						
Owner/representative: Bob Connelly	Owner's phone: 651-247-0299					
Brief system description: Pre-cast 1500 gallon septic tank, gravity r						
System status						
System status on date (mm/dd/yyyy): _5/2/2021						
☐ Compliant – Certificate of compliance*	☑ Noncompliant – Notice of noncompliance					
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)	An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months o receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.					
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.					
Reason(s) for noncompliance (check all applicable)						
☐ Impact on public health (Compliance component #1) – I	mminent threat to public health and safety					
☐ Tank integrity (Compliance component #2) – Failing to	protect groundwater					
☐ Other Compliance Conditions (Compliance component	#3) – Imminent threat to public health and safety					
☐ Other Compliance Conditions (Compliance component	#3) – Failing to protect groundwater					
System not abandoned according to Minn. R. 7080.250	0 (Compliance component #3) – Failing to protect groundwater					
Soil separation (Compliance component #5) – Failing to	protect groundwater					
Operating permit/monitoring plan requirements (Compli	ance component #4) – Noncompliant - local ordinance applies					
Comments or recommendations						
Observed ponding in all five trenches. No backups or sewag may not take effluent much longer.	e surfacing were observed during site visit, however this system

<ul><li>☑ Soil observation logs</li><li>☑ Locally required forms</li><li>☑ Other information (list):</li><li>Site sketch</li></ul>	☐ Tank Integrity Assessment ☐ Operating Permit					

### 1. Impact on public health – Compliance component #1 of 5 Compliance criteria: Attached supporting documentation: System discharges sewage to the ☐ Yes\* ☐ No Other: ground surface ☐ Yes\* ⊠ No System discharges sewage to drain tile or surface waters. System causes sewage backup into ☐ Yes\* ⊠ No dwelling or establishment. Any "yes" answer above indicates the system is an imminent threat to public health and safety. Describe verification methods and results: No signs of backup during site visit 4/30/2021. All five trenches were ponded at time of inspection - this system could leak sewage at the surface or backup into the dwelling at any time in the near future. 2. Tank integrity – Compliance component #2 of 5 Attached supporting documentation: Compliance criteria: System consists of a seepage pit, ☐ Yes\* ☒ No □ Pumped at time of inspection cesspool, drywell, leaching pit, **Smilies** Name of maintenance business: or other pit? License number of maintenance business: 2428 Sewage tank(s) leak below their ☐ Yes\* ⊠ No designed operating depth? Date of maintenance: 4/30/2021 □ Existing tank integrity assessment (Attach) Date of maintenance (mm/dd/yyyy): (must be within three years) If yes, which sewage tank(s) leaks: (See form instructions to ensure assessment complies with Any "yes" answer above indicates the system Minn. R. 7082.0700 subp. 4 B (1)) is failing to protect groundwater. ☐ Tank is Noncompliant (pumping not necessary – explain below) Other: Describe verification methods and results: Present for pumping by Smilies Sewer 4/30/2021. Tank watertight and baffles in place.

3.	Other compliance conditions – Compliance component #3 of 5			
	3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unse	cured?		
	3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety? ☐ Yes* ☒ No ☐ Unknown *Yes to 3a or 3b - System is an imminent threat to public health and safety.			
	3c. System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes* ⊠ No		
	3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes* ⊠ No		
	*Yes to 3c or 3d - System is failing to protect groundwater.			
	Describe verification methods and results:			
	Attached supporting documentation:   Not applicable			
4.	Operating permit and nitrogen BMP* – Compliance component #4 o	f 5 🛛 Not applicable		
	Is the system operated under an Operating Permit? ☐ Yes ☐ No	f "yes", A below is required		
	Is the system required to employ a Nitrogen BMP specified in the system design?   Yes No If "yes", B below is required.			
	BMP = Best Management Practice(s) specified in the system design			
	If the answer to both questions is "no", this section does not need to be completed	í.		
	Compliance criteria:			
	a. Have the operating permit requirements been met? ☐ Yes ☐ No			
	b. Is the required nitrogen BMP in place and properly functioning? $\ \square$ Yes $\ \square$ No			
	Any "no" answer indicates noncompliance.			
	Describe verification methods and results:			
	Attached supporting documentation:   Operating permit (Attach)

### 5. Soil separation – Compliance component #5 of 5 Unknown Date of installation 10/2/1992 (mm/dd/yyyy) Shoreland/Wellhead protection/Food ☐ Yes ☒ No Attached supporting documentation: beverage lodging? Soil observation logs completed for the report (Attach) ☐ Two previous verifications of required vertical Compliance criteria (select one): separation (Attach) ☐ Yes ⊠ No\* 5a. For systems built prior to April 1, 1996. ☐ Not applicable (No soil treatment area) and not located in Shoreland or Wellhead Protection Area or not serving a food. beverage or lodging establishment: Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock. 5b. Non-performance systems built April 1, ☐ Yes ☐ No\* Indicate depths or elevations 1996, or later or for non-performance 97.0' A. Bottom of distribution media systems located in Shoreland or Wellhead Protection Areas or serving a food, B. Periodically saturated soil/bedrock 98.5 beverage, or lodging establishment: -1.5' C. System separation Drainfield has a three-foot vertical D. Required compliance separation\* 2.0' separation distance from periodically saturated soil or bedrock.\* \*May be reduced up to 15 percent if allowed by Local Ordinance. 5c. "Experimental", "Other", or "Performance" ☐ Yes ☐ No\* systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Advanced Inspector License required) Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock. \*Any "no" answer above indicates the system is failing to protect groundwater. Describe verification methods and results:

**Upgrade requirements:** (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict.

This provision does not apply to systems in shoreland areas. Wellhead Protection Areas, or those used in connection with food,

beverage, and lodging establishments as defined in law.
