ZIERKE SOIL TESTING

Cindy Johnson 20877 Juno Court N Forest Lake, MN 55025

6/18/2021

Dear Cindy Johnson,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your system is <u>compliant</u>. A certification of compliance is in effect for three years from the date it is issued. To be clear, this should not be construed as a guarantee of future system function – there are too many factors that influence the lifespan of a septic system for an inspector to predict or even guess how long a septic system will last. A copy of this report will be filed with your local unit of government for their records.

Sincerely,

Benjamin Zierke

MPCA Lic 119, Cert 9594

Compliance inspection report form

Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached supporting documentation – additional local requirements may also apply. Further information can be found here: https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance.

Property information	Local tracking number:	
Parcel ID# or Sec/Twp/Range: 2403221120020 Local	regulatory authority: Washington County	
Property address: 20877 Juno Ct N Forest Lake, MN 55025		
Owner/representative: Cindy Johnson	Owner's phone: 651-433-0163	
Brief system description: Pre-cast split 1500 gallon tank, gravity roc	k trench drainfield with distribution box	
System status		
System status on date (mm/dd/yyyy): 6/18/2021		
☐ Compliant – Certificate of compliance* ☐	Noncompliant – Notice of noncompliance	
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)	An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8. Systems failing to protect ground water must be upgraded,	
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	replaced, or use discontinued within the time required by local ordinance.	
Reason(s) for noncompliance (check all applicable)		
☐ Impact on public health (Compliance component #1) – I	mminent threat to public health and safety	
☐ Tank integrity (Compliance component #2) – Failing to µ	ACT NOT THE PARTY OF THE PARTY	
☐ Other Compliance Conditions (Compliance component	#3) – Imminent threat to public health and safety	
☐ Other Compliance Conditions (Compliance component	#3) – Failing to protect groundwater	
System not abandoned according to Minn. R. 7080.250	0 (Compliance component #3) – Failing to protect groundwater	
☐ Soil separation (Compliance component #5) – Failing to	protect groundwater	
Operating permit/monitoring plan requirements (Compli	ance component #4) – Noncompliant - local ordinance applies	
Comments or recommendations		
Recommend repairing alarm on lift station.		
Certification

Soil observation logs ☐ Locally required forms	☐ Tank Integrity Assessment ☐ Operating Permit	
☑ Other information (list): Site sketch		

1. Impact on public health - Compliance component #1 of 5 Attached supporting documentation: Compliance criteria: System discharges sewage to the ☐ Yes* ⊠ No Other: ground surface System discharges sewage to drain ☐ Yes* ⊠ No tile or surface waters. System causes sewage backup into ☐ Yes* ☒ No dwelling or establishment. Any "yes" answer above indicates the system is an imminent threat to public health and safety. Describe verification methods and results: No signs of surface discharge or backup observed during site visit 6/16/2021. 2. Tank integrity – Compliance component #2 of 5 Attached supporting documentation: Compliance criteria: ☐ Yes* ☒ No □ Pumped at time of inspection System consists of a seepage pit, cesspool, drywell, leaching pit, or other pit? Name of maintenance business: Olsons Sewage tank(s) leak below their ☐ Yes* ☐ No License number of maintenance business: 216 designed operating depth? 6/16/2021 Date of maintenance: Existing tank integrity assessment (Attach) Date of maintenance (mm/dd/yyyy): (must be within three years) If yes, which sewage tank(s) leaks: Any "yes" answer above indicates the system (See form instructions to ensure assessment complies with Minn. R. 7082.0700 subp. 4 B (1)) is failing to protect groundwater. Tank is Noncompliant (pumping not necessary – explain below) ☐ Other: Describe verification methods and results: Present for pumping by Olson's Sewer Service 6/16/2021. Tank watertight and baffles in place. Alarn not functional at time of inspection.

3. Other compliance conditions – Compliance component #3 of 5			
3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unse ☐ Yes* ☒ No ☐ Unknown	ecured?		
3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safe: *Yes to 3a or 3b - System is an imminent threat to public health and safety.	y? ☐ Yes* ⊠ No ☐ Unknown		
3c. System is non-protective of ground water for other conditions as determined by inspector?3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes* ☒ No ☐ Yes* ☒ No		
*Yes to 3c or 3d - System is failing to protect groundwater. Describe verification methods and results:			
Attached supporting documentation: Not applicable			
4. Operating permit and nitrogen BMP* – Compliance component #4 of	of 5 Not applicable		
Is the system operated under an Operating Permit? ☐ Yes ☐ No			
Is the system required to employ a Nitrogen BMP specified in the system design? Yes No	If "yes", A below is required If "yes", B below is required		
	If "yes", B below is required		
Is the system required to employ a Nitrogen BMP specified in the system design? No BMP = Best Management Practice(s) specified in the system design	If "yes", B below is required		
Is the system required to employ a Nitrogen BMP specified in the system design? BMP = Best Management Practice(s) specified in the system design If the answer to both questions is "no", this section does not need to be complete Compliance criteria: a. Have the operating permit requirements been met?	If "yes", B below is required		
Is the system required to employ a Nitrogen BMP specified in the system design? BMP = Best Management Practice(s) specified in the system design If the answer to both questions is "no", this section does not need to be complete Compliance criteria: a. Have the operating permit requirements been met? b. Is the required nitrogen BMP in place and properly functioning? Yes No	If "yes", B below is required		
Is the system required to employ a Nitrogen BMP specified in the system design? 5. Soil separation – Compliance component #5 of 5 Date of installation 1978 Unknown (mm/dd/yyyy) Attached supporting documentation: Shoreland/Wellhead protection/Food beverage lodging? Soil observation logs completed for the report (Attach) Two previous verifications of required vertical Compliance criteria (select one): separation (Attach) ☐ Yes ☐ No* 5a. For systems built prior to April 1, 1996, ☐ Not applicable (No soil treatment area) and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment: Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock. 5b. Non-performance systems built April 1, Indicate depths or elevations 1996, or later or for non-performance A. Bottom of distribution media 97.3' systems located in Shoreland or Wellhead Protection Areas or serving a food, 94.7'+ B. Periodically saturated soil/bedrock beverage, or lodging establishment: 2.6'+ C. System separation Drainfield has a three-foot vertical 3.0' (2.55' with D. Required compliance separation* separation distance from periodically allowance) saturated soil or bedrock.* *May be reduced up to 15 percent if allowed by Local Ordinance. 5c. "Experimental", "Other", or "Performance" ☐ Yes ☐ No* systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Advanced Inspector License required) Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.

*Any "no" answer above indicates the system is failing to protect groundwater.

Describe verification methods and results:

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
