SEPTIC SYSTEM PERMIT REMINDER

On November 01, 2021 a permit was issued for a subsurface sewage treatment system (SSTS) located at 220 Lake Elmo Ave N to replace the existing non-compliant system. The Washington County Department of Public Health & Environment issued orders that the SSTS be replaced within six (6) months.

The six-month deadline has passed, and as of the date of this correspondence, our records show that the new septic system has either not been installed or has not been issued a Certificate of Compliance. Please contact Sarah Borrell at 651-430-6692 or by email at sarah.borrell@co.washington.mn.us and provide an update as to when the SSTS will be replaced and brought into compliance.

The Department recognizes that repairing or replacing an SSTS can seem like a daunting task. Financial assistance is available through Washington County in the form of low-interest loans and grants from low-income residents. Please visit www.washington.mn.us/septic for more information on financial assistance and the processes of repairing or replacing an SSTS.

Sincerely,

A handwritten signature in black ink that reads "Sarah Borrell".
