

Compliance inspection report form **Existing Subsurface Sewage Treatment System (SSTS)**

520 Lafayette Road North St. Paul, MN 55155-4194

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

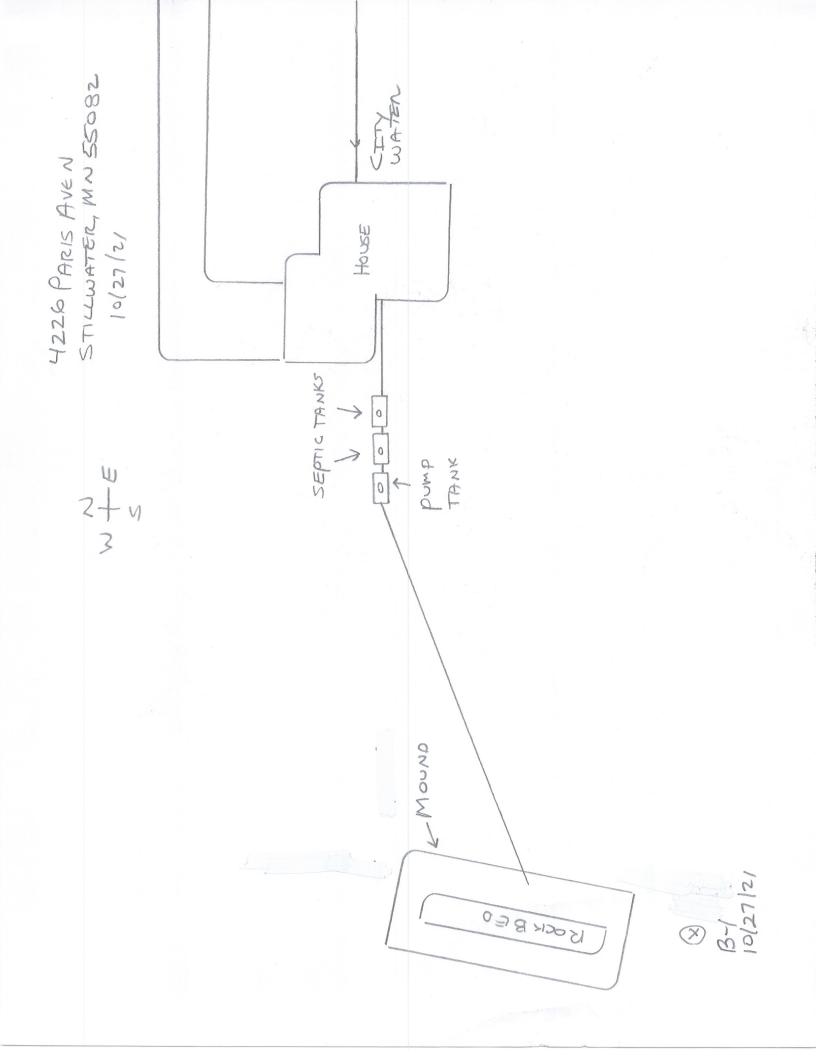

Property information	Local tracking number:

Brief system description: Two precast septic tanks and a pump			
System status			
System status on date (mm/dd/yyyy):10/27/2021			
☐ Compliant – Certificate of compliance*	☐ Noncompliant – Notice of noncompliance		
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.) *Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance. An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receip of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.		
Soil separation (Compliance component #5) – Failing	ent #3) – Imminent threat to public health and safety ent #3) – Failing to protect groundwater 2500 (Compliance component #3) – Failing to protect groundwater g to protect groundwater mpliance component #4) – Noncompliant - local ordinance applies

	Compliance criteria (select one):			☐ Two previous verifications of required vertical separation	
	5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment: Drainfield has at least a two-foot vertical	☐ Yes	□ No*	☐ Not applicable (No soil treatment area ☐	a)
	separation distance from periodically saturated soil or bedrock.				
		⊠ Yes	□ No*	Indicate depths or elevations	
				A. Bottom of distribution media	100.5
				B. Periodically saturated soil/bedrock	97.0
				C. System separation	3.5
				D. Required compliance separation*	3
				*May be reduced up to 15 percent if allo	owed by Local
	5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required ≤ 2,500 gallons per day; Advanced Inspector License required > 2,500 gallons per day)	☐ Yes	□ No*		
	Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.				
	*Any "no" answer above indicates the system failing to protect groundwater.				
	Describe verification methods and results:				

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
