ZIERKE SOIL TESTING

Brett Seiberlich 18446 672nd Lane Jacobson, MN 55752

11/19/2021

Dear Brett Seiberlich,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your system is <u>compliant</u>. A certification of compliance is in effect for three years from the date it is issued. To be clear, this should not be construed as a guarantee of future system function – there are too many factors that influence the lifespan of a septic system for an inspector to predict or even guess how long a septic system will last. A copy of this report will be filed with your local unit of government for their records.

Sincerely,

Benjamin Zierke

Compliance inspection report form

Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

3. Other compliance conditions – Compliance component #3 of	5
3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.	c.), or unsecured?
☐ Yes* ☑ No ☐ Unknown	
3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public hear	lth or safety? ☐ Yes* ☒ No ☐ Unknown
*Yes to 3a or 3b - System is an imminent threat to public health and safety.	
3c. System is non-protective of ground water for other conditions as determined by insp	pector? ☐ Yes* ☒ No
3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes* ⊠ No
*Yes to 3c or 3d - System is failing to protect groundwater.	
Describe verification methods and results:	
Attached supporting documentation: Not applicable	
4. Operating permit and nitrogen BMP* – Compliance component	ent #4 of 5 🛛 Not applicable
Is the system operated under an Operating Permit? ☐ Ye	s No If "yes", A below is required
Is the system required to employ a Nitrogen BMP specified in the system design? $\ \square$ Ye	s 🗌 No If "yes", B below is required
BMP = Best Management Practice(s) specified in the system design	
If the answer to both questions is "no", this section does not need to be o	ompleted.
Compliance criteria:	
a. Have the operating permit requirements been met?	
b. Is the required nitrogen BMP in place and properly functioning? ☐ Yes ☐ No	
Any "no" answer indicates noncompliance.

saturated soil or bedrock.*			*May be reduced up to 15 percent if allo Ordinance.	owed by Local
5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required ≤ 2,500 gallons per day; Advanced Inspector License required > 2,500 gallons per day)	☐ Yes	□ No*		
Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.				

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
