Hi Tyler,

Yes there are definite plans of municipal sewer as part of the Wildflower 4th Addition. The services are already physically installed at the property, but main lines still require testing before connections are allowed. The city plans on sending a formal notice in the next month to the building owners, informing them that connection is available, but they may need to wait until next spring to get the work scheduled.

Dear Ben,

The septic system at 11550 Stillwater Blvd North has been found to be non-compliant. The owners of the system have requested an extension to bring the system into compliance. They stated that the building is in the process of connecting to municipal sewer service. Before I issue an extension I wanted to double check with the City that there are definite plans of municipal sewer services being brought to this property. Could you let me know if this is the case?

Thanks and let me know if you have any questions.
