Cottage Grove, MN 55016

Existing Septic System Compliance at 11301 Inman Ave South

To Whom It May Concern,

The Washington County Department of Public Health and Environment (Department) has received two valid compliance inspection reports with different conclusions. The compliance inspectors were willing to meet onsite to resolve the differences, however, did not receive authorization to perform additional site work or meet onsite from the property owner. The periodically saturated soil dispute process laid out in Washington County Ordinance #206 section 8.13 was followed.

The Washington County Department of Public Health and Environment used the following information in making a periodically saturated soil dispute determination:

1. Dale Eklin, certification number 695, completed soil borings and percolation tests for the soil treatment area on August 9, 1996 and the City of Cottage Grove issued a septic system installation permit on October 7, 1996. An as-built report for the individual subsurface sewage treatment system was completed on October 10, 1996.
2. A compliance inspection report submitted to the Department by Midwest Sewer Services on January 5, 2022.
3. A compliance inspection report submitted to the Department by Kloepfner Services & Design (KSD) on January 19, 2022.

Based on the information provided, the Department has determined the septic system to be compliant as found by the KSD compliance inspection report. If you have any questions please contact me at 651-430-6692 or sarah.borrell@co.washington.mn.us.

Sincerely,

A handwritten signature in black ink that reads "Sarah Borrell".

Sarah Borrell
Sr. Environmental Specialist
