

Compliance inspection report form

Existing Subsurface Sewage Treatment System (SSTS)

520 Lafayette Road North St. Paul, MN 55155-4194

Doc Type: Compliance and Enforcement

Instructions: Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached supporting documentation – additional local requirements may also apply. Further information can be found here: https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance.

Parcel ID# or Sec/Twp/Range: Local regulatory authority: Washington County Property address: 9361 230 th Street N, Forest Lake MN 55025 Owner/representative: Tom Haseltine Owner's phone: 612-685-5853 Brief system description: 2-1000 gallon tanks to an inground gravity trench system System status System status on date (mm/dd/yyyy): _5/13/2022 Compliant - Certificate of compliance*	must be onths of I by	
Owner's phone: 612-685-5853 Brief system description: 2-1000 gallon tanks to an inground gravity trench system System status System status on date (mm/dd/yyyy): _5/13/2022 Compliant - Certificate of compliance* (Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.) *Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance. Reason(s) for noncompliance (check all applicable) mpact on public health (Compliance component #1) - Imminent threat to public health and safety other Compliance Conditions (Compliance component #3) - Imminent threat to public health and safety other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater other Compliance Conditions (Compliance component #3) - Failing to protect groundwater	must be onths of I by	
System status on date (mm/dd/yyyy): _5/13/2022 Compliant - Certificate of compliance* (Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.) *Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance. Reason(s) for noncompliance (check all applicable) Impact on public health (Compliance component #1) - Imminent threat to public health and safety Tank integrity (Compliance component #2) - Failing to protect groundwater Other Compliance Conditions (Compliance component #3) - Imminent threat to public health and safety Other Compliance Conditions (Compliance component #3) - Failing to protect groundwater System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) - Failing to protect groundwater Operating permit/monitoring plan requirements (Compliance component #4) - Noncompliant - local ordinance applications.	must be onths of I by	
System status on date (mm/dd/yyyy): _5/13/2022	onths of I by ed,	
System status on date (mm/dd/yyyy): _5/13/2022	onths of I by ed,	
Compliant - Certificate of compliance* (Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.) *Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance. Reason(s) for noncompliance (check all applicable) □ Impact on public health (Compliance component #1) − Imminent threat to public health and safety □ Tank integrity (Compliance component #2) − Failing to protect groundwater □ Other Compliance Conditions (Compliance component #3) − Imminent threat to public health and safety □ System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) − Failing to protect groundwater □ Operating permit/monitoring plan requirements (Compliance component #4) − Noncompliant - local ordinance appliance component #4 − Noncompliance	onths of I by ed,	
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.) *Note: Compliance indicates conformance with Minn. Certification		
I hereby certify that all the necessary information has been gathered to determine the compliance status of this system. No determination of future system performance has been nor can be made due to unknown conditions during system construction, abuse of the system, inadequate maintenance, or future water usage.	oossible	
By typing my name below, I certify the above statements to be true and correct, to the best of my knowledge, and that this info can be used for the purpose of processing this form.	rmation	
Business name: MJL Contracting Inc. Certification number: 8190		
Inspector signature: Danielle Lang License number: 2449	License number: 2449	
(This document has been electronically signed) Phone: 763-244-9070		
Necessary or locally required supporting documentation (must be attached)		
 Soil observation logs □ Operating Pe □ Other information (list): 	 ermit	

1. Impact on public health – Compliance component #1 of 5 Compliance criteria: Attached supporting documentation: ☐ Yes* ⊠ No Other: System discharges sewage to the ground surface ☐ Not applicable ☐ Yes* ☒ No System discharges sewage to drain tile or surface waters. ☐ Yes* ☒ No System causes sewage backup into dwelling or establishment. Any "yes" answer above indicates the system is an imminent threat to public health and safety. Describe verification methods and results: searched for seepage in yard 2. Tank integrity - Compliance component #2 of 5 Compliance criteria: Attached supporting documentation: System consists of a seepage pit, ☐ Yes* ☐ No Pumped at time of inspection cesspool, drywell, leaching pit, or other pit? Name of maintenance business: Hassle Free Sewage tank(s) leak below their ☐ Yes* ☐ No License number of maintenance business: 3287 designed operating depth? Date of maintenance: ☐ Existing tank integrity assessment (Attach) Date of maintenance (mm/dd/yyyy): (must be within three years) If yes, which sewage tank(s) leaks: Any "yes" answer above indicates the system (See form instructions to ensure assessment complies with Minn. R. 7082.0700 subp. 4 B (1)) is failing to protect groundwater. ☐ Tank is Noncompliant (pumping not necessary – explain below) Other: Describe verification methods and results:

visual

3.	Other compliance conditions – Compliance component #3 of 5				
	3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unsecured? ☐ Yes* ☒ No ☐ Unknown				
	3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety. *Yes to 3a or 3b - System is an imminent threat to public health and safety.	/? ☐ Yes* ⊠ No ☐ Unknown			
	3c. System is non-protective of ground water for other conditions as determined by inspector?	⊠ Yes* □ No			
	3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes* ☒ No			
	*Yes to 3c or 3d - System is failing to protect groundwater.				
	Describe verification methods and results:				
	Visual				
	Attached supporting documentation: Not applicable				
_	a	(5. 			
4.	Operating permit and nitrogen BMP* – Compliance component #4 o	Not applicable			
	Is the system operated under an Operating Permit?	f "yes", A below is required			
	Is the system required to employ a Nitrogen BMP specified in the system design? \square Yes \square No	f "yes", B below is required			
	BMP = Best Management Practice(s) specified in the system design				
	If the answer to both questions is "no", this section does not need to be completed	I.			
	Compliance criteria:				
	a. Have the operating permit requirements been met? ☐ Yes ☐ No				
	b. Is the required nitrogen BMP in place and properly functioning? $\ \square$ Yes $\ \square$ No				
	Any "no" answer indicates noncompliance.				
	Describe verification methods and results:				
	Attached supporting documentation: Operating permit (Attach)

5. Soil separation – Compliance component #5 of 5

Date of installation 6/13/1994 (mm/dd/yyyy)	_ Unknown		
Shoreland/Wellhead protection/Food beverage lodging?	☐ Yes ⊠ No	Attached supporting documentation: Soil observation logs completed for the re	eport (Attach)
Compliance criteria (select one): 5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment: Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock. 5b. Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment: Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*	☐ Yes ☑ No*	Two previous verifications of required vertical separation (Attach) Not applicable (No soil treatment area) Indicate depths or elevations A. Bottom of distribution media B. Periodically saturated soil/bedrock C. System separation D. Required compliance separation* *May be reduced up to 15 percent if allowed by Local Ordinance.	
5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Advanced Inspector License required) Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock. *Any "no" answer above indicates the failing to protect groundwater.			

Describe verification methods and results:

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
