

# Compliance inspection report form

520 Lafayette Road North St. Paul, MN 55155-4194

## **Existing Subsurface Sewage Treatment System (SSTS)**

Doc Type: Compliance and Enforcement

**Instructions:** Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached supporting documentation – additional local requirements may also apply. Further information can be found here: <a href="https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf">https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf</a>.

Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance.

Property information	Local tracking number:				
Parcel ID# or Sec/Twp/Range: 2203221330003 Local	regulatory authority: Washington County				
Property address: 20109 HARROW AVE N Forest Lake MN	o , , , , , , , , , , , , , , , , , , ,				
Owner/representative: Lisa Walter	Owner's phone: 612-469-5698				
Brief system description: House to septic tank to lift tank to mound	system				
System status					
System status on date (mm/dd/yyyy): _6/24/2022					
☑ Compliant – Certificate of compliance*	Noncompliant – Notice of noncompliance				
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)  *Note: Compliance indicates conformance with Minn.	An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.  Systems failing to protect ground water must be upgraded,				
R. 7080.1500 as of system status date above and does not guarantee future performance.	replaced, or use discontinued within the time required by local ordinance.				
Reason(s) for noncompliance (check all applicable)					
□ Impact on public health (Compliance component #1) – Imminent threat to public health and safety □ Tank integrity (Compliance component #2) – Failing to protect groundwater □ Other Compliance Conditions (Compliance component #3) – Imminent threat to public health and safety □ Other Compliance Conditions (Compliance component #3) – Failing to protect groundwater □ System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) – Failing to protect groundwater □ Soil separation (Compliance component #5) – Failing to protect groundwater □ Operating permit/monitoring plan requirements (Compliance component #4) – Noncompliant - local ordinance applies  Comments or recommendations  Pump tanks every 2-3 years					
Certification					
I hereby certify that all the necessary information has been gathered to determination of future system performance has been nor can be made abuse of the system, inadequate maintenance, or future water usage.	de due to unknown conditions during system construction, possible				
By typing my name below, I certify the above statements to be true can be used for the purpose of processing this form.	and correct, to the best of my knowledge, and that this information

<ul><li>☑ Soil observation logs</li><li>☐ Locally required forms</li><li>☐ Other information (list):</li></ul>	☐ Tank Integrity Assessment ☐ Operating Permit				

1. Impact on public health - Compliance component #1 of 5 Compliance criteria: Attached supporting documentation: System discharges sewage to the ☐ Yes\* ⊠ No ☐ Other: ground surface ☐ Not applicable System discharges sewage to drain ☐ Yes\* ☒ No tile or surface waters. System causes sewage backup into ☐ Yes\* ⊠ No dwelling or establishment. Any "ves" answer above indicates the system is an imminent threat to public health and safety. Describe verification methods and results: Visual 2. Tank integrity - Compliance component #2 of 5 Compliance criteria: Attached supporting documentation: System consists of a seepage pit, ☐ Yes\* ☑ No □ Pumped at time of inspection cesspool, drywell, leaching pit, or other pit? **Boettcher** Boettcher Excavating & Name of maintenance business: Septic ☐ Yes\* ☒ No Sewage tank(s) leak below their License number of maintenance business: 42296624 designed operating depth? Date of maintenance: 6/1314/2022 ☐ Existing tank integrity assessment (Attach) Date of maintenance (mm/dd/yyyy): If yes, which sewage tank(s) leaks: (must be within three years) Any "yes" answer above indicates the system (See form instructions to ensure assessment complies with is failing to protect groundwater. Minn. R. 7082.0700 subp. 4 B (1)) ☐ Tank is Noncompliant (pumping not necessary – explain below) Other: Describe verification methods and results: Tank were pumped and inspected at time of tank pumping Visual inspection

3.	Other compliance conditions – Compliance component #3 of 5					
	3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unse	ecured?				
	3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safet *Yes to 3a or 3b - System is an imminent threat to public health and safety.	ty? ☐ Yes*      No ☐ Unknown				
	3c. System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes* ☒ No				
	3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes* ⊠ No				
	*Yes to 3c or 3d - System is failing to protect groundwater.					
	Describe verification methods and results:					
	Visual inspection					
	Attached supporting documentation:   Not applicable					
Л	Operating powerit and nitrogen DB4D*					
	Solution   Leading   Le					
	Attached supporting documentation:   Operating permit (Attach)

#### 5. Soil separation – Compliance component #5 of 5

Date of installation (mm/dd/yyyy)	_⊠ Unknown		
Shoreland/Wellhead protection/Food beverage lodging?  Compliance criteria (select one):  5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:  Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.  5b. Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:  Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*	☐ Yes ☐ No*	Attached supporting documentation:  Soil observation logs completed for the Two previous verifications of required separation (Attach)  Not applicable (No soil treatment area Bench mark 100' manhole cover on soil bench mar	eptic tank.  Elv. 102.3' Elv. 99' Elv. 3.3' 3' minus 15%
5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Advanced Inspector License required)  Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.  *Any "no" answer above indicates the	Yes No*		

Describe verification methods and results:

failing to protect groundwater.

**Upgrade requirements:** (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
