# **ZIERKE SOIL TESTING**

Gordy Farrington 21755 Oldfield Ave N Scandia, MN 55073

October 4th, 2022

Dear Gordy Farrington,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your system is <u>non-compliant</u> due to a lack of vertical separation between the bottom of your drain field and indicators of seasonally wet soil (redoximorphic features). Therefore, this system is considered "failing to protect groundwater" and <u>is not</u> <u>considered an imminent threat to public health</u>. I am required to provide copies of this report to you and to Washington County. You should contact them as to the next steps that will be required to bring the system into compliance.

Sincerely,

Benjanien Zieske

Benjamin Zierke MPCA Lic 119, Cert 9594

## Compliance inspection report form

## Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at <a href="https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf">https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf</a>.

## **Property information**

	Local tracking	number:
Parcel ID# or Sec/Twp/Range: 1403220230004	Reason for Inspection	Sale
Local regulatory authority info: Washington County		
Property address: 21755 Oldfield Ave N Scandia, MN 55073		
Owner/representative: Gordy Farrington		Owner's phone: <u>612-860-6614</u>
Brief system description: 1500 gallon septic tank, 1000 gallon se	ptic tank, 1000 gallon lift ta	nk, drop box rock trench drainfield

### System status

System status on date (mm/dd/yyyy): 10/4/2022

#### Compliant – Certificate of compliance\*

(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)

\*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.

#### Noncompliant – Notice of noncompliance

Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.

An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.

#### Reason(s) for noncompliance (check all applicable)

Impact on public health (Compliance component #1) - Imminent threat to public health and safety

Tank integrity (Compliance component #2) - Failing to protect groundwater

Other Compliance Conditions (Compliance component #3) - Imminent threat to public health and safety

Other Compliance Conditions (Compliance component #3) - Failing to protect groundwater

System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) – Failing to protect groundwater

Soil separation (Compliance component #5) – *Failing to protect groundwater* 

Operating permit/monitoring plan requirements (Compliance component #4) – Noncompliant - local ordinance applies

#### **Comments or recommendations**

## Certification

I hereby certify that all the necessary information has been gathered to determine the compliance status of this system. No determination of future system performance has been nor can be made due to unknown conditions during system construction, possible abuse of the system, inadequate maintenance, or future water usage.

By typing my name below, I certify the above statements to be true and correct, to the best of my knowledge, and that this information can be used for the purpose of processing this form.

Business name: Zierke Soil Testing	Certification number: 9594				
Inspector signature: Benjanian Zierke	License number: 119				
(This document has been electronically signed)	Phone: 651-249-1346				

## Necessary or locally required supporting documentation (must be attached)

Soil observation logs	System/As-Built	Locally required forms	Tank Integrity Assessment	Operating Permit
Other information (list):				

### 1. Impact on public health – Compliance component #1 of 5

Compliance criteria:		Attached supporting documentation:
System discharges sewage to the ground surface	🗌 Yes* 🛛 No	☐ Other:
System discharges sewage to drain tile or surface waters.	🗌 Yes* 🛛 No	
System causes sewage backup into dwelling or establishment.	🗌 Yes* 🛛 No	
Any "yes" answer above indicates	the system is an	

imminent threat to public health and safety.

#### Describe verification methods and results:

None of the above observed during site visits 9/21/2022 and 9/29/2022. Gordy reported no past issues with the system - everything functional during site visits.

## 2. Tank integrity – Compliance component #2 of 5

Compliance criteria:		Attached supporting docu	imentation:	
System consists of a seepage pit, cesspool, drywell, leaching pit,	🗌 Yes* 🛛 No	Empty tank(s) viewed by ins		
or other pit?		Name of maintenance busir	ness: <u>Smilies</u>	
Sewage tank(s) leak below their	🗌 Yes* 🛛 No	License number of mainten	ance business: <u>2428</u>	
designed operating depth?		Date of maintenance:	9/21/2022	
		Existing tank integrity asses	ssment (Attach)	
		Date of maintenance		
If yes, which sewage tank(s) leaks:		(mm/dd/yyyy): (n	(must be within three years)	
Any "yes" answer above indicates the system is failing to protect groundwater.		(See form instructions to en Minn. R. 7082.0700 subp. 4	sure assessment complies with B (1))	
		Tank is Noncompliant (pump	oing not necessary – explain below)	
		Other:		

#### Describe verification methods and results:

Present for pumping by Smilies Sewer 9/21/2022. Confirmed tanks watertight and baffles in place with camera.

### 3. Other compliance conditions – Compliance component #3 of 5

	Describe verification methods and results:				
	*Yes to 3c or 3d - System is failing to protect groundwater.				
3d.	System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes*	🖾 No		
3c.	System is non-protective of ground water for other conditions as determined by inspector?	🗌 Yes*	🖾 No		
	*Yes to 3a or 3b - System is an imminent threat to public health and safety.				
3b.	Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety?	🗌 Yes*	🛛 No 🔲 Unknown		
	□ Yes*				
За.	a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unsecured?				

Attached supporting documentation: 
Not applicable

## **4. Operating permit and nitrogen BMP\*** – Compliance component #4 of 5 🛛 Not applicable

Is the system operated under an Operating Permit?	🗌 Yes	🗌 No	If "yes", A below is required
Is the system required to employ a Nitrogen BMP specified in the system design?	🗌 Yes	🗌 No	If "yes", B below is required
BMP = Best Management Practice(s) specified in the system design			
If the answer to both questions is "no", this section does not need to	be co	mplete	ed.

☐ Yes ☐ No

#### Compliance criteria:

a.	Have th	e operating	permit	requirements	been	met?
----	---------	-------------	--------	--------------	------	------

b. Is the required nitrogen BMP in place and properly functioning?

#### Any "no" answer indicates noncompliance.

Describe verification methods and results:

Attached supporting documentation: Operating permit (Attach)

#### **5.** Soil separation – Compliance component #5 of 5

Date of installation 11/3/1993 (mm/dd/yyyy)	_ 🗌 Unknown		
<ul> <li>Shoreland/Wellhead protection/Food beverage lodging?</li> <li>Compliance criteria (select one):</li> <li>5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:</li> <li>Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.</li> <li>5b. Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:</li> <li>Drainfield has a three-foot vertical separation distance from periodically</li> </ul>	<ul> <li>Yes □ No</li> <li>Yes □ No*</li> <li>Yes ⊠ No*</li> </ul>	<ul> <li>Soil observation logs completed for the report</li> <li>Two previous verifications of required vertical</li> <li>Not applicable (No soil treatment area)</li> </ul>	
saturated soil or bedrock.*		D. Required compliance separation* *May be reduced up to 15 percent if allo Ordinance.	3.0' wed by Local
5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required ≤ 2,500 gallons per day; Advanced Inspector License required > 2,500 gallons per day) Drainfield meets the designed vertical separation distance from periodically	Yes No*		

\*Any "no" answer above indicates the system is failing to protect groundwater.

Describe verification methods and results:

**Upgrade requirements:** (*Minn. Stat.* § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
