

520 Lafayette Road North St. Paul, MN 55155-4194

Compliance inspection report form

Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

An imminent threat to public upgraded, replaced, or its us of this notice or within a shor under section 145A.04 subdite) — Imminent threat to public to protect groundwater at #3) — Imminent threat to public the protect groundwater at #3) — Failing to protect groundwater to protect groundwater at to protect groundwater at protect groundwater	ound water must be upgraded, replaced, or time required by local ordinance. health and safety (ITPHS) must be see discontinued within ten months of receipt ter period if required by local ordinance or ivision 8. health and safety

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.

SS Septic Solutions, LLC additional terms and information.

- SS Septic Solutions has not been retained to warrant, guarantee, or certify the proper functioning of the system for any period beyond the inspection date. Due to the numerous factors (usage, maintenance, tank pumping, soil characteristics, previous failures, etc.) which may affect the proper operation of a septic system. The report shall not be construed as a warranty that the system will properly function for any particular period of time.
- 2. Minimum compliance inspection requirements relative to this inspection and this report include only verification that the septic system has a watertight septic tank(s) and lift tank, the required separation from the bottom of the drain field/mound distribution medium and saturated soils, no backup of sewage into the dwelling and no discharge of sewage onto the ground surface or surface water. SS Septic Solutions, LLC does not inspect basement sewage ejector pumps or exterior lift pumps as they are a maintenance item. Sewage backup verification is limited to the information supplied by the last occupants/owner if available. I can not guarantee that the information given to me is accurate. Some people may attempt to hide or conceal signs of previous backups.
- 3. Certification of this system does not warranty any future use beyond the date of inspection. Any system new or old can be hydraulically overloaded because of more people moving into the house than were previously occupying it, improper maintenance, heavy usage, tree roots, freezing conditions or surface drainage problems. The system could simply stop working due to age.
- 4. A compliance inspection is not meant to be a test of the longevity of the septic system. The inspection is strictly for the purpose of determining if the septic is polluting the environment at the date and time the inspection is performed. The inspection is not intended to determine if the system was originally designed or installed to past or present MPCA or local unit of government code requirements.
- 5. Winter Work Client understand that inspections conducted in winter weather conditions are more difficult to perform due to snow cover and frost. Septic system components like tanks, tank covers, drop boxes and soil treatment areas are more difficult to locate in these conditions. Soil borings and drain field locations are also more difficult to perform due to ground frost. The client needs to understand that due to the weather conditions, the same level of standards may not be possible compared to an inspection during the spring/summer/fall months.
- 6. If hired to perform the compliance inspection, the client hereby agrees that SS Septic Solutions, LLC will not be responsible for any monetary damages, claims or causes of action including attorney fees arising from the performance of this inspection.

DRINKING WATER LABORATORY TEST REPORT

Last Name:

JOHNSON

First Name:

DAVE

Address:

13890 116TH ST N

City: State:

County: Legal:

MN

STILLWATER

Zip Code: 55082

File #: 79749

Date/Time

6/9/2023 10:06 AM in Lab:

Unique Well #:

Drillers #:

Ordered By:

SS SEPTIC SOLUTIONS

Sampled From:

Bath Tap

Sampled By:

SS SEPTIC SOLUTIONS

Date/Time Sampled: 06/08/2023 1300

Reason For Test: Coliform + Nitrate + Arsenic + Lead

Sample Temp:

24.8 ° C

Received on Ice: No

ANALYTE & METHOD	DATE & TIME OF ANALYSIS	MAXIMUM CONTAMINATION LEVEL (EPA)	TEST RESULTS
Coliform Bacteria (SM 9223 B)	06/09/2023 1445	Negative	Negative
E. coli Bacteria (SM 9223 B)	06/09/2023 1445	Negative	Negative
Nitrate + Nitrite (EPA 353.2 Rev 2.0)	06/09/2023 1336	10.0 ppm	3.10 ppm
Nitrate (EPA 353.2 Rev 2.0)	06/09/2023 1336	10.0 ppm	3.10 ppm
Nitrite (EPA 353.2 Rev 2.0)	06/09/2023 1407	1,0 ppm	< 0.5 ppm
Arsenic (EPA 200.9 Rev 2.2)	06/13/2023 1239	10.0 µg/L	< 2.0 µg/L
Lead (SM 3113 B-99)	06/12/2023 1113	15.0 μg/L	< 2.5 μg/L

This sample

DOES

meet EPA guidelines for safe drinking water for the Analytes tested.
