# **ZIERKE SOIL TESTING**

Kathy Smith 20555 Harrow Ave N Forest Lake, MN 55025

7/3/2023

Dear Kathy Smith,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your septic system is <u>compliant</u>. A certification of compliance is in effect for three years from the date it is issued. To be clear, this should not be construed as a guarantee of future system function – there are too many factors that influence the lifespan of a septic system for an inspector to predict or even guess how long a septic system will last. A copy of this report will be filed with your local unit of government for their records.

Sincerely,

Benjamier Zieske

## Compliance inspection report form

## Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at <a href="https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf">https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf</a>.

Property information	Local tracking	number:
Parcel ID# or Sec/Twp/Range: 2103221140001	Reason for Inspection	Sale
Local regulatory authority info: Washington County		
Property address: 20555 Harrow Ave N Forest Lake, MN 55025		
Owner/representative: Kathy Smith		Owner's phone: <u>651-366-1602</u>
Brief system description: 1250 gallon septic tank, 1000 gallon sept	ic tank (with filter), 1000 g	allon lift tank, mound dispersal system

## System status

System status on date (mm/dd/yyyy): 7/3/2023

#### Compliant – Certificate of compliance\*

(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)

\*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.

#### □ Noncompliant – Notice of noncompliance

Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.

An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.

#### Reason(s) for noncompliance (check all applicable)

Impact on public health (Compliance component #1) – Imminent threat to public health and safety

Tank integrity (Compliance component #2) - Failing to protect groundwater

Other Compliance Conditions (Compliance component #3) - Imminent threat to public health and safety

Other Compliance Conditions (Compliance component #3) - Failing to protect groundwater

System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) - Failing to protect groundwater

Soil separation (Compliance component #5) – Failing to protect groundwater

Operating permit/monitoring plan requirements (Compliance component #4) - Noncompliant - local ordinance applies

#### **Comments or recommendations**

Mound system functioning normally during site visit 6/30/2023. Homeowner reported no past issues with the system. Identified two issues with system - inlet baffle on first septic tank is missing and alarm on filter was not functional. Recommend having both issues fixed - homeowner requested quote from Olson's Sewer to repair.

## Certification

I hereby certify that all the necessary information has been gathered to determine the compliance status of this system. No determination of future system performance has been nor can be made due to unknown conditions during system construction, possible abuse of the system, inadequate maintenance, or future water usage.

By typing my name below, I certify the above statements to be true and correct, to the best of my knowledge, and that this information can be used for the purpose of processing this form.

Business name: Zierke Soil Testing	Certification number: 9594
Inspector signature: Benjanian Zierka	License number: 119

## Necessary or locally required supporting documentation (must be attached)

Soil observation logs	🛛 System/As-Built	Locally required forms	Tank Integrity Assessment	Operating Permit
Other information (list):				

## 1. Impact on public health – Compliance component #1 of 5

Compliance criteria:		_ Attached supporting documentation:
System discharges sewage to the ground surface	🗌 Yes* 🛛 No	☐ Other: _
System discharges sewage to drain ile or surface waters.	🗌 Yes* 🛛 No	
System causes sewage backup into Iwelling or establishment.	🗌 Yes* 🛛 No	
Any "yes" answer above indicates	•	

#### Describe verification methods and results:

None of the above observed during site visit 6/30/2023.

## 2. Tank integrity – Compliance component #2 of 5

Compliance criteria:		Attached supporting documentation	:
System consists of a seepage pit, cesspool, drywell, leaching pit, or other pit?	🗌 Yes* 🛛 No	☑ Empty tank(s) viewed by inspector Name of maintenance business:	Olson's
Sewage tank(s) leak below their	🗌 Yes* 🛛 No	License number of maintenance busines	ss: 216
designed operating depth?		Date of maintenance:	6/30/2023
		Existing tank integrity assessment (Attac	ch)
If yes, which sewage tank(s) leaks:		Date of maintenance (mm/dd/yyyy): (must be withir	n three years)
Any "yes" answer above indication in the indication of the second s		(See form instructions to ensure assess Minn. R. 7082.0700 subp. 4 B (1))	ment complies with
		Tank is Noncompliant (pumping not neces	sary – explain below)
		Other:	

#### Describe verification methods and results:

Tanks water tight and baffles in place - examined with go pro camera.

## 3. Other compliance conditions – Compliance component #3 of 5

	*Yes to 3c or 3d - System is failing to protect groundwater. Describe verification methods and results:		
30	d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes*	🖾 No
30	c. System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes*	🖾 No
	*Yes to 3a or 3b - System is an imminent threat to public health and safety.		
38	p. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety	′? □ Yes*	🛛 No 📋 Unknown
	🗌 Yes* 🖾 No 📋 Unknown		
38	a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unse	cured?	

Attached supporting documentation: 
Not applicable

## **4. Operating permit and nitrogen BMP\*** – Compliance component #4 of 5 🛛 Not applicable

Is the system operated under an Operating Permit?	🗌 Yes	🗌 No	If "yes", A below is required
Is the system required to employ a Nitrogen BMP specified in the system design?	🗌 Yes	🗌 No	If "yes", B below is required
BMP = Best Management Practice(s) specified in the system design			

☐ Yes ☐ No

#### If the answer to both questions is "no", this section does not need to be completed.

#### **Compliance criteria:**

a. Have the operating permit requirements been met?

b. Is the required nitrogen BMP in place and properly functioning?

#### Any "no" answer indicates noncompliance.

Describe verification methods and results:

Attached supporting documentation: Operating permit (Attach)

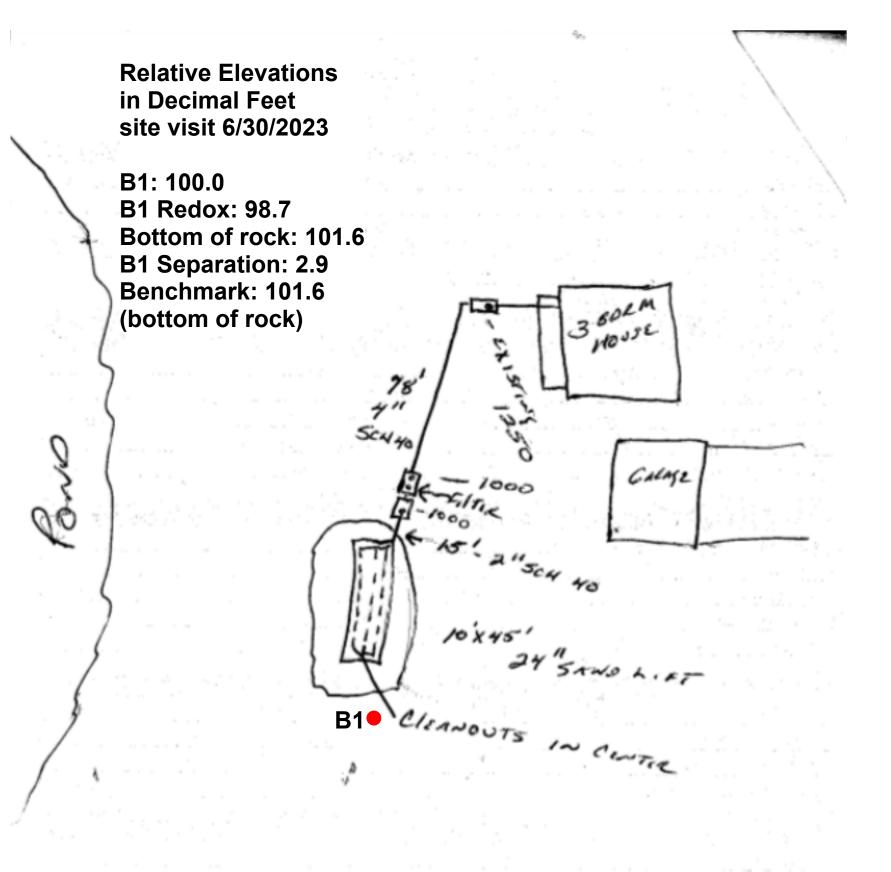

## **5.** Soil separation – Compliance component #5 of 5

	1/4/2015 m/dd/yyyy)	Unkn	iown		
<ul> <li>Shoreland/Wellhead profibeverage lodging?</li> <li>Compliance criteria (s. 5a. For systems built prior not located in Shoreland Protection Area or not beverage or lodging estimated soil or bedrood</li> <li>Drainfield has at least a separation distance from saturated soil or bedrood</li> <li>5b. Required compliance separation*         *May be reduced up to 15 percent if allo Ordinance.	vertical separation a) 101.6' 98.7' 2.9' 2.55'
5c. "Experimental", "Other" systems built under pre Type IV or V systems b Rules 7080. 2350 or 70 (Intermediate Inspector 2,500 gallons per day; License required > 2,50 Drainfield meets the de separation distance fro saturated soil or bedroo	e-2008 Rules; built under 2008 080.2400 r License required ≤ Advanced Inspector 00 gallons per day) esigned vertical m periodically	☐ Yes	□ No*		

\*Any "no" answer above indicates the system is failing to protect groundwater.

Describe verification methods and results:

**Upgrade requirements:** (*Minn. Stat.* § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
