ZIERKE SOIL TESTING

Lori Molina 4659 Ozark Ave S Afton, MN 55001

March 10th, 2024

Dear Lori Molina,

At your request, I have conducted a septic inspection to determine the compliance status of your septic system pursuant to Minnesota Rules Chapter 7080.1500.

The compliance test set out in 7080.1500 has three main inquiries: 1). Is the system functioning hydraulically (disposing of effluent in a manner that prevents it from coming in contact with people)? 2). Are the septic tanks water tight? 3). Does the system have sufficient vertical separation between the bottom of the septic system and restrictive layers (bedrock, standing water, seasonally wet layers, etc) to provide full treatment of effluent?

Based off of these criteria, your system is <u>non-compliant</u> due to a lack of soil separation from redox features and the drainfield and two block style bottomless septic tanks. This system is considered "failing to protect groundwater" and <u>is not considered an imminent threat to public health</u>. I am required to provide copies of this report to you and to Washington County. You should contact them as to the next steps that will be required to bring the system into compliance.

Sincerely,

Benjanier Zieske

Benjamin Zierke MPCA Lic 119, Cert 9594

Compliance inspection report form

Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

Property information

	Local tracking	number:
Parcel ID# or Sec/Twp/Range: <u>2802820410006</u>	Reason for Inspection	Sale
Local regulatory authority info: Washington County		
Property address: 4659 Ozark Ave S Afton, MN 55001		
Owner/representative: Lori Molina		_ Owner's phone: <u>612-916-7345</u>
Brief system description: (2) block tanks and drainfield		

System status

System status on date (mm/dd/yyyy): 3/10/2024

Compliant – Certificate of compliance*

(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)

*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.

Noncompliant – Notice of noncompliance

Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.

An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.

Reason(s) for noncompliance (check all applicable)

- Impact on public health (Compliance component #1) Imminent threat to public health and safety
- Tank integrity (Compliance component #2) Failing to protect groundwater
- Other Compliance Conditions (Compliance component #3) Imminent threat to public health and safety
- Other Compliance Conditions (Compliance component #3) Failing to protect groundwater
- System not abandoned according to Minn. R. 7080.2500 (Compliance component #3) Failing to protect groundwater
- Soil separation (Compliance component #5) Failing to protect groundwater
- Operating permit/monitoring plan requirements (Compliance component #4) Noncompliant local ordinance applies

Comments or recommendations

Winter conditions present during first site visit 2/27/2024 - including frozen ground. Water was not on in the house and Lori indicated that it had not been on for some time. Located the tanks - the inspection hole on the first tank has been plugged with soil. I was able to located it with a probe. The second tank had a clear inspection opening - the tank was totally dry and block sidewalls with a dirt bottom were visible. Made second site visit to record soil observation 3/9/2023.

Certification

I hereby certify that all the necessary information has been gathered to determine the compliance status of this system. No determination of future system performance has been nor can be made due to unknown conditions during system construction, possible abuse of the system, inadequate maintenance, or future water usage.

By typing my name below, I certify the above statements to be true and correct, to the best of my knowledge, and that this information can be used for the purpose of processing this form.

Necessary or locally required supporting documentation (

Necessary or locally required supporting documentation (must be attached)

Soil observation logs	🛛 System/As-Built	Locally required forms	Tank Integrity Assessment	Operating Permit
Other information (list):				

1. Impact on public health – Compliance component #1 of 5

ompliance criteria:		_ Attached supporting documentation:
System discharges sewage to the ground surface	🗌 Yes* 🛛 No	☐ Other: ⊠ Not applicable
stem discharges sewage to drain or surface waters.	🗌 Yes* 🛛 No	
stem causes sewage backup into elling or establishment.	🗌 Yes* 🛛 No	
ny "yes" answer above indicates	-	

Describe verification methods and results:

None of the above observed.

2. Tank integrity – Compliance component #2 of 5

	Attached supporting documentation:	
Yes* 🗌 No	Empty tank(s) viewed by inspector Name of maintenance business:	
🛛 Yes* 🔲 No	License number of maintenance business: Date of maintenance: Existing tank integrity assessment (Attach)	
Both	Date of maintenance (mm/dd/yyyy): (must be within three years)	
ates the system er.	(See form instructions to ensure assessment complies with Minn. R. 7082.0700 subp. 4 B (1))	
	🔀 Tank is Noncompliant (pumping not necessary – explain below)	
	Other:	
	Yes* □ No Both ates the system	

Describe verification methods and results:

Viewed empty tank via inspection cap, camera, spotlight. See notes on page one.

3. Other compliance conditions – Compliance component #3 of 5

	Describe verification methods and results:			
	*Yes to 3c or 3d - System is failing to protect groundwater.			
3d.	System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes*	🖾 No	
3c.	System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes*	🛛 No	
	*Yes to 3a or 3b - System is an imminent threat to public health and safety.			
3b.	Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safety?	☐ Yes*	🛛 No 🔲 Unknown	
	□ Yes* 🛛 No 🔲 Unknown			
За.	a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or unsecured?			

Attached supporting documentation:
Not applicable

4. Operating permit and nitrogen BMP* – Compliance component #4 of 5 🛛 Not applicable

Is the system operated under an Operating Permit?	🗌 Yes	🗌 No	If "yes", A below is required
Is the system required to employ a Nitrogen BMP specified in the system design?	' □ Yes	🗌 No	If "yes", B below is required
BMP = Best Management Practice(s) specified in the system design			

☐ Yes ☐ No

If the answer to both questions is "no", this section does not need to be completed.

Compliance criteria:

a. Have the operating permit requirements been met?

b. Is the required nitrogen BMP in place and properly functioning?

Any "no" answer indicates noncompliance.

Describe verification methods and results:

Attached supporting documentation: Operating permit (Attach)

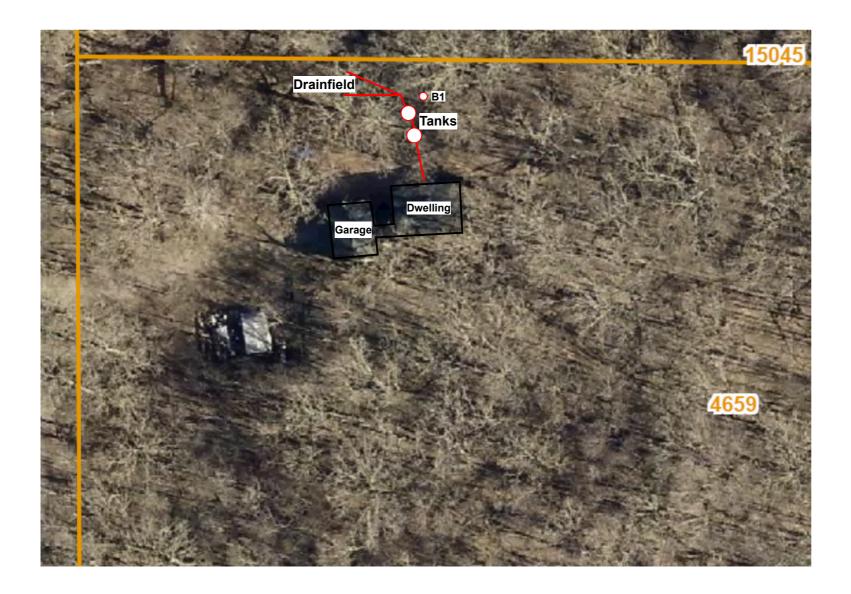

5. Soil separation – Compliance component #5 of 5

Date of installation 1968 (mm/dd/yyyy)	_ 🗌 Unknown			
Shoreland/Wellhead protection/Food beverage lodging? Compliance criteria (select one):	☐ Yes ⊠ No	Attached supporting documentation: Soil observation logs completed for the report Two previous verifications of required vertical separa		
5a.For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:	☐ Yes ⊠ No*	Not applicable (No soil treatment area)		
Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.				
 5b. Non-performance systems built April 1, 1996, or later or for non- performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment: Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.* 	☐ Yes ☐ No*	Indicate depths or elevations A. Bottom of distribution media B. Periodically saturated soil/bedrock C. System separation D. Required compliance separation* *May be reduced up to 15 percent if allo Ordinance.	16" 12" -4" 24" owed by Local	
 5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required ≤ 2,500 gallons per day; Advanced Inspector License required > 2,500 gallons per day) Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock. 	☐ Yes ☐ No*			

*Any "no" answer above indicates the system is failing to protect groundwater.

Describe verification methods and results:

Upgrade requirements: (*Minn. Stat.* § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
