

Compliance inspection report form **Existing Subsurface Sewage Treatment System (SSTS)**

520 Lafayette Road North St. Paul, MN 55155-4194

Doc Type: Compliance and Enforcement

Instructions: Inspector must submit completed form to Local Governmental Unit (LGU) and system owner within 15 days of final determination of compliance or noncompliance. Instructions for filling out this form are located on the Minnesota Pollution Control Agency (MPCA) website at https://www.pca.state.mn.us/sites/default/files/wq-wwists4-31a.pdf.

Property information	Local tracking number:
Parcel ID# or Sec/Twp/Range: 25.028.22.11.0004	Reason for Inspection property sale
Local regulatory authority info: Washington County	property sale
Property address: 2867 Bailey Rd Newport, MN 55055	
Owner/representative: Curt Olson	Owner's phone: 651-260-4477
Brief system description: Two precast septic tanks and a precase	
System status	
System status on date (mm/dd/yyyy): 9/17/2024	
☐ Compliant – Certificate of compliance*	☐ Noncompliant – Notice of noncompliance
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 145A.04, subdivision 8 is discovered or	Systems failing to protect ground water must be upgraded, replaced, or use discontinued within the time required by local ordinance.
a shorter time frame exists in Local Ordinance.)	An imminent threat to public health and safety (ITPHS) must be
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance or under section 145A.04 subdivision 8.
 □ Other Compliance Conditions (Compliance componed System not abandoned according to Minn. R. 7080. □ Soil separation (Compliance component #5) – Failine □ Operating permit/monitoring plan requirements (Corcomments or recommendations Reviewed permit, design, soil, inspection and pumping residue.) – Imminent threat to public health and safety to protect groundwater ent #3) – Imminent threat to public health and safety ent #3) – Failing to protect groundwater 2500 (Compliance component #3) – Failing to protect groundwater to protect groundwater mpliance component #4) – Noncompliant - local ordinance applies
Certification	
I hereby certify that all the necessary information has been gathered future system performance has been nor can be made due to unknowinadequate maintenance, or future water usage.	to determine the compliance status of this system. No determination of wn conditions during system construction, possible abuse of the system,
By typing my name below, I certify the above statements to be true used for the purpose of processing this form.	and correct, to the best of my knowledge, and that this information can be

5a. For systems built prior to April 1, 1996, a not located in Shoreland or Wellhead	nd Yes No	☐ Not applicable (No soil treatment area)	
Protection Area or not serving a food, beverage or lodging establishment:			
Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.			
5b. Non-performance systems built		Indicate depths or elevations	
April 1, 1996, or later or for non- performance systems located in Shoreland	nd	A. Bottom of distribution media 2.4	
or Wellhead Protection Areas or serving food, beverage, or lodging establishment		B. Periodically saturated soil/bedrock 5.5	
Drainfield has a three-foot vertical		C. System separation 3.1	
separation distance from periodically saturated soil or bedrock.*		D. Required compliance separation* 3.0	
		*May be reduced up to 15 percent if allowed by Loca Ordinance.	al
5c. "Experimental", "Other", or "Performance systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required 2.500 gallons per day; Advanced Inspect License required > 2,500 gallons per day	d ≤ tor		
Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.			

The tanks and drainfield have some roots in them, which may affect their longevity.

Upgrade requirements: (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
