## Compliance inspection report form Existing Subsurface Sewage Treatment System (SSTS)

Doc Type: Compliance and Enforcement

## Instructions:

Control Agency (MPCA) website at

Instructions for filling out this form are located on the Minnesota Pollution

Parcel ID# or Sec/Twp/Range: 1802820210001	Local tracking	
Local regulatory authority info: Washington County	Reason for Inspection	Transfer of deed
Property address: 12336 22ND ST S, CITY OF AFTON		
Owner/representative: VANDERBOSCH DEBRA L		
Brief system description: Two 1000 gallon septic tanks going to	o in around desire.	Owner's phone: 651-343-8505
y and the state of the tarks going to	o in ground draintield	
System status		
System status on date (mm/dd/yyyy): 8/22/2024		
□ Compliant – Certificate of compliance*	☐ Noncompliant – Noti	ce of noncompliance
(Valid for 3 years from report date unless evidence of an imminent threat to public health or safety requiring removal and abatement under section 1454 04, subdivision 2 is discovered.	Systems failing to protect gro	ound water must be upgraded, replaced, or ime required by local ordinance.
abatement under section 145A.04, subdivision 8 is discovered or a shorter time frame exists in Local Ordinance.)		health and safety (ITPHS) must be
*Note: Compliance indicates conformance with Minn. R. 7080.1500 as of system status date above and does not guarantee future performance.	upgraded, replaced, or its us	e discontinued within ten months of receipt ter period if required by local ordinance or
Reason(s) for noncompliance (check all applical	ble)	
☐ Impact on public health (Compliance component #1	10.00	health and safety
☐ Tank integrity (Compliance component #2) – Failing	to protect groundwater	noditi dila salety
Other Compliance Conditions (Compliance compon	ent #3) – Imminent threat to i	nublic hoalth and actatu
Other Compliance Conditions (Compliance compon	ent #3) – Failing to amtoct or	ounductor
Soil concretion (Compliance according to Minn. R. 7080.	2500 (Compliance company	ounawater
Soil separation (Compliance component #5) – Failin	a to protect aroundwater	II #3) — Falling to protect groundwater
Operating permit/monitoring plan requirements (Cor	nnliance component #4\	
Comments or recommendations	inhugure component #4) - M	oricompliant - local ordinance applies
Certification		
hereby certify that all the necessary information has been gathered in future system performance has been nor can be made due to unknow nadequate maintenance, or future water usage.	to determine the compliance sta vn conditions during system cor	atus of this system. No determination of astruction, possible abuse of the system,
By typing my name below, I certify the above statements to be true used for the purpose of processing this form.	and correct, to the best of my k	nowledge, and that this information can be

	Property Address: 12336 22ND ST S, CITY OF AFTON	
В	Business Name: SS Septic Solutions, LLC.	Date: 8/22/2024
3.	Other compliance conditions – Compliance component #3 of 5	
	3a. Maintenance hole covers appear to be structurally unsound (damaged, cracked, etc.), or uns	ecured?
	☐ Yes ☑ No ☐ Unknown	
	3b. Other issues (electrical hazards, etc.) to immediately and adversely impact public health or safe	tv?□Yes ⊠No□Unknown
	3c. System is non-protective of ground water for other conditions as determined by inspector?	☐ Yes ⊠ No
	3d. System not abandoned in accordance with Minn. R. 7080.2500?	☐ Yes ⊠ No
	Describe verification methods and results:	
	Attached supporting documentation:   Not applicable	
4.	Operating permit and nitrogen BMP* – Compliance component #4 c	f 5 Not applicable
	Is the system operated under an Operating Permit? ☐ Yes ☐ No	If "yes", A below is required
	Is the system required to employ a Nitrogen BMP specified in the system design? ☐ Yes ☐ No	TT C 12.70
	BMP = Best Management Practice(s) specified in the system design	
	If the answer to both questions is "no", this section does not need to be complete	d.
	Compliance criteria:	
	a. Have the operating permit requirements been met? ☐ Yes ☐ No	
	b. Is the required nitrogen BMP in place and properly functioning? ☐ Yes ☐ No	
	Describe verification methods and results:	
	Attached supporting documentation:   Operating permit (Attach)	

usiness Name: SS Septic Solutions, LLC.			Date: _8	3/22/2024
Soil separation – Compliance cor	npone	nt #5 o	f 5	
Date of installation (mm/dd/yyyy)	_ ⊠ Unkr	nown		
Shoreland/Wellhead protection/Food beverage lodging?  Compliance criteria (select one):	☐ Yes	⊠ No	Attached supporting documentation:  ☐ Soil observation logs completed for the ☐ Two previous verifications of required	e report
5a. For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food, beverage or lodging establishment:	☐ Yes	□ No	☐ Not applicable (No soil treatment area ☐	(##X)
Drainfield has at least a two-foot vertical separation distance from periodically saturated soil or bedrock.				
April 1, 1996, or later or for non-	⊠ Yes	□ No	Indicate depths or elevations	
performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:			A. Bottom of distribution media     B. Periodically saturated soil/bedrock	2.5' 5.5'
Drainfield has a three-foot vertical			C. System separation	3'
separation distance from periodically			D. Required compliance separation*	3'
saturated soil or bedrock.*			*May be reduced up to 15 percent if allo Ordinance.	wed by Local
5c. "Experimental", "Other", or "Performance" systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules 7080. 2350 or 7080.2400 (Intermediate Inspector License required ≤ 2,500 gallons per day; Advanced Inspector License required > 2,500 gallons per day)	☐ Yes	□ No		
Drainfield meets the designed vertical separation distance from periodically saturated soil or bedrock.				

Describe verification methods and results:

**Upgrade requirements:** (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.

## 2SS Septic Solutions, LLC additional terms and information.

- 1. SS Septic Solutions, LLC has not been retained to warrant, guarantee, or certify the proper functioning of the system for any period beyond the inspection date. Due to numerous factors (usage, maintenance, tank pumping, soil characteristics, previous failures, etc.) which may affect the proper operation of a septic system. The report shall not be construed as a warranty that the system will properly function for any period.
- 2. Minimum compliance inspection requirements relative to this inspection and this report include only verification that the septic system has a watertight septic tank(s) and lift tank, the required separation from the bottom of the drain field/mound distribution medium and saturated soils, no backup of sewage into the dwelling and no discharge of sewage onto the ground surface or surface water. SS Septic Solutions, LLC does not inspect basement sewage ejector pumps or exterior lift pumps as they are a maintenance item. Sewage backup verification is limited to the information supplied by the last occupants/owner if available. I cannot guarantee that the information given to me is accurate. Some people may attempt to hide or conceal signs of previous backups.
- 3. Certification of this system does not warranty any future use beyond the date of inspection. Any system, new or old, can be hydraulically overloaded because of more people moving into the house than were previously occupying it, improper maintenance, heavy usage, tree roots, freezing conditions, or surface drainage problems. The system could simply stop working due to age.
- 4. A compliance inspection is not meant to be a test of the longevity of the septic system. The inspection is strictly for the purpose of determining if the septic is polluting the environment at the date and time the inspection is performed. The inspection is not intended to determine if the system was originally designed or installed to past or present MPCA or local unit of government code requirements.
- 5. Winter Work Client understands that inspections conducted in winter weather conditions are more difficult to perform due to snow cover and frost. Septic system components like tanks, tank covers, drop boxes and soil treatment areas are more difficult to locate in these conditions. Soil borings and drain field locations are also more difficult to perform due to ground frost. The client needs to understand that due to the weather conditions, the same level of standards may not be possible compared to an inspection during the spring/summer/fall months.
- 6. If hired to perform the compliance inspection, the client hereby agrees that SS Septic Solutions, LLC will not be responsible for any monetary damages, claims or causes of action including attorney fees arising from the performance of this inspection.
- 7. Nothing other than gray water (laundry, showers, etc.) human waste and toilet tissue should be disposed of into the septic tanks. Garbage disposals are not recommended. Smaller amounts of laundry, soaps, dish soap, cleaning agents, etc. are better for the system. Antibacterial soaps and chlorine agents may kill the bacteria needed to treat effluent properly. Additives are not recommended and may be harmful to your system. Recommend to pump and clean your tanks by a certified pumper every other year if you have 1 tank and every 2-3 years if you have a 2-tank system to ensure proper maintenance.
