Compliance Inspection Form

Existing Subsurface Sewage Treatment Systems (SSTS)

Doc Type: Compliance and Enforcement

For local tracking purposes: Instructions: Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached forms - additional local requirements may also apply. Submit completed form to Local Unit of Government (LUG) and system owner within 15 days System Status System status on date (mm/dd/yyyy): 6-5-17 Compliant – Certificate of Compliance Noncompliant - Notice of Noncompliance (Valid for 3 years from report date, unless shorter time (See Upgrade Requirements on page 3) frame outlined in Local Ordinance.) Reason(s) for noncompliance (check all applicable) ☐ Impact on Public Health (Compliance Component #1) – Imminent threat to public health and safety Other Compliance Conditions (Compliance Component #3) - Imminent threat to public health and safety □ Tank Integrity (Compliance Component #2) – Failing to protect groundwater Other Compliance Conditions (Compliance Component #3) - Failing to protect groundwater ☐ Soil Separation (Compliance Component #4) – Failing to protect groundwater Operating permit/monitoring plan requirements (Compliance Component #5) - Noncompliant **Property Information** Parcel ID# or Sec/Twp/Range: Property address: 18/ 18 nooduog st Makine on storage Reason for inspection: or Owner's representative: Representative phone: Regulatory authority phone: Brief system description: Comments or recommendations: Certification I hereby certify that all the necessary information has been gathered to determine the compliance status of this system. No determination of future system performance has been nor can be made due to unknown conditions during system construction, possible abuse of the system, inadequate maintenance, or future water usage. Inspector name: Certification number: Business name: Inspector signature: **Necessary or Locally Required Attachments** Soil boring logs ☐ System/As-built drawing Forms per local ordinance Other information (list):

Pro	perty address: 18/ 6 Wooduo	4 31	Inspector initials/Date: LC 6-5-(/							
1.	Impact on Public Health – Co) mpliance component	#1 of 5							
	Compliance criteria:		Verification method(s):							
	System discharge sewage to the ground surface.	☐ Yes 🌠 No	Searched for surface outlet Searched for seeping in yard/backup in home							
	System discharge sewage to drain tile or surface waters.	☐ Yes ' No	 Excessive ponding in soil system/D-boxes Homeowner testimony (See Comments/Explanation) "Black soil" above soil dispersal system 							
	System cause sewage backup into dwelling or establishment.	☐ Yes ဩ'No	System requires "emergency" pumping Performed dye test							
	Any "yes" answer above indicate an Imminent Threat to Public Hea		☐ Unable to verify (See Comments/Explanation) ☐ Other methods not listed (See Comments/Explanation)							
	Comments/Explanation:

Property address: 18/ Broadlas 31 Manie on Story Inspector initials/Date: LC. 6-8-17 4. **Soil Separation** – Compliance component #4 of 5 Date of installation: Unknown Verification method(s): Shoreland/Wellhead protection/Food Beverage ☐ Yes 🔀 No Soil observation does not expire. Previous soil Lodging? observations by two independent parties are sufficient, Compliance criteria: unless site conditions have been altered or local requirements differ. Yes No For systems built prior to April 1, 1996, and Conducted soil observation(s) (Attach boring logs) not located in Shoreland or Wellhead Protection Area or not serving a food, ☐ Two previous verifications (Attach boring logs) beverage or lodging establishment: ☐ Not applicable (Holding tank(s), no drainfield) Drainfield has at least a two-foot vertical ☐ Unable to verify (See Comments/Explanation) separation distance from periodically ☐ Other (See Comments/Explanation) saturated soil or bedrock. ☐ Yes ☐ No Non-performance systems built April 1, Comments/Explanation: 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment: Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.* mound 1's and base ☐ Yes ☐ No "Experimental", "Other", or "Performance" Indicate depths of elevations systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules (7080. A. Bottom of distribution media 2350 or 7080.2400 (Advanced Inspector License required) B. Periodically saturated soil bedrock Drainfield meets the designed vertical C. System separation separation distance from periodically saturated soil or bedrock. 2411 D. Required compliance separation* Any "no" answer above indicates the system is *May be reduced up to 15 percent if allowed by Local Failing to Protect Groundwater. Ordinance. Operating Permit and Nitrogen BMP* – Compliance component #5 of 5 ☐ Not applicable ☐ Yes ☐ No Is the system operated under an Operating Permit? If "yes", A below is required ☐ Yes ☐ No Is the system required to employ a Nitrogen BMP? If "yes", B below is required

BMP=Best Management Practice(s) specified in the system design If the answer to both questions is "no", this section does not need to be completed. Compliance criteria a. Operating Permit number: ☐ Yes ☐ No Have the Operating Permit requirements been met? b. Is the required nitrogen BMP in place and properly functioning? ☐ Yes ☐ No

Any "no" answer indicates Noncompliance.

Upgrade Requirements (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, repaired, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.

LABORATORY ANALYSIS REPORT 552-17

Tuesday, June 06, 2017

MDH CERTIFIED LABORATORY 027-003-130 EPA LAB CODE MN 00076

Attn: Larry Christiansen Scandia Compliance Insp 16115 Quality Trl. N Scandia, MN 55073

Date Collected: 6/5/2017 Date Received: 6/5/2017

Collected By: Client

Parameter/Method	Sample ID	Results	Units	MDL	Reporting Limit	Analysis Date	
(Total) Coliform Bacteria SM 9223 B (Colilert)	781 Broadway (552-17-01A)	Absent	(P-A)	Absent	Absent	6/5/2017	
Nitrate SM 4500-NO3 E-00	781 Broadway (552-17-01A)	<0.030	mg/L	0.0025	0.030	6/6/2017	

MDL = Method detection level

Temp Blank >4.0 degrees C

Sample was collected on 6/5/17 at 13:30, received by IRI on 6/5/17 at 14:41 and analyzed on 6/5/17 at 15:11 for total coliform and 6/6/17 at 14:00 foe nitrate. Sample DOES meet MDH and EPA guidelines for safe drinking water for analytes tested. The results are only indicative for the sample tested from the sample point on the date collected.

All analyses were performed using Minnesota Department of Health approved methodologies.

Report submitted by,

SUZANNE MELCHIOR, LABORATORY MANAGER

Alzama M. Melshir

SM/kg

The results in this report apply only to the samples analyzed in accordance with the chain of custody document. This report must be reproduced in its entirety.
